Good afternoon Commissioner Long:

It was a pleasure to see you again during the meeting with our Regional Administrator this past Wednesday. As you heard, the UIC team in this office continues to be busy reviewing technical data, and that is the main reason for writing to you today. I would like to check with you on the possibility of confirming/obtaining some water supply well (WSW) data.

Attached are two image files depicting satellite views of what I suspect might potentially be WSW locations, one of which may be familiar to you. These potential locations are found, as you can see, immediately south of FM Road 1961 and east of Highway 183 in Goliad County. If you could kindly identify, and let me know, which one of these two is your well location by noting the image file name, I would appreciate it.

Also attached are a water supply well schematic and a Texas water well report (former TNRCC's form 0199). The attached schematic was drawn using the information in the water well report. If you happen to have a similar water well report for your supply well, or any other similar piece of information describing in detail the completion of your water well, I would appreciate your sharing a copy of the same with us, so that we can prepare a schematic with site specific data, for use in our aquifer simulation work and technical analysis.

I hope that you and yours are doing fine, I look forward to hearing from you. Have a nice weekend.  
Sincerely,

José Eduardo Torres - 6WQ-SG
